ORDERING INFORMATION

Mail orders are promptly filled and despatched on a 7-day examination basis, subject to approval. Immediate refund guaranteed on return of the specimen(s), in good condition.

Please quote the name and number of the specimen(s) required, and enclose P.O./Cheque with order. All prices are inclusive of V.A.T.

No charge is made for postage and packing, except for overseas customers and postage over 75p.

We reserve the right to make slight substitutions, if necessary, unless advised to the contrary.

Special requests and "wants lists" are welcome.

We hope that we may be of some service to you, and assure you of our best attention at all times.

MAY 1978

1. ADAMITE. Mina Ojuela, Mapimi, Durango, Mexico. Fine lustrous yellow-green sprays of sharp terminated crystals to 1/4" intergrown and scattered over limonitic matrix. 2½x2½x1½", £9.00

2. ALBITE. Rauris, nr. Salzburg, Austria. Lustrous sharp creamy crystals to 8 mm in size thickly lining a 2x1" cavity in matrix with silky AMANTHUS. 3x2½x1½", £6.50p

3. ANATASE. St. Gotthard, Ticino, Switzerland. Sharp deep bluish crystals to 4 mm in size scattered over matrix with small Quartz crystals. 2x1½", £9.00

4. ANGLESITE. Monte Poni, Iglesias, Sardinia. Fine large sharp colourless crystals to ½" in size lining a 2x1" cavity in Galena matrix with other Anglesite crystals scattered in places. 3½x2½x1½", £38.00

5. APATITE. Panasqueira, Beira-Beixa, Portugal. Fine translucent light green sharp hexagonal crystals to ½" in size scattered on and partially embedded in a group of large mostly clear well terminated QUARTZ crystals, the largest being 4" long by 2" across the axis. There are also several sharp light green Apatite crystals enclosed in the Quartz crystals making interesting phantoms. A little drusy pale brown Siderite encrusts the sides of the Quartz crystals in places. Fine specimen for display. 5x2½x4" high. £115.00

6. APOPHYLLITE. Cutcairn, Co. Antrim, N. Ireland. A sharp transparent doubly terminated crystal ½x½" implanted on matrix with creamy white Gyrolite and Okenite, 2x1½", £2.75p

7. ARAGONITE. Tazoula, near Sefrou, Morocco. Specimen A: Select ball-like mass of sharp translucent intergrown hexagonal orangey-red crystals to 1 cm in size. 2½x1½", £3.25p. Specimen B: Select ball-like clusters of sharp hexagonal crystals to ½" in size. Each approx 1x1", £1.25p each.

8. ARDENNITE. Saltn-Chateau, Ardennes, Belgium. Rich golden radiated crystalline masses embedded in milky quartz. Specimen A: 2x2x1", £4.50p. Specimen B: 1½x1x1", £2.75p

9. ARSENOPYRITE. Trepca, Yugoslavia. Fine bright silvery sharp crystals to 1 cm in size associated with elongated milky QUARTZ crystals to ½" in length, sharp translucent CALCITE crystals to ½" in size, and a little blackish Sphalerite. Very attractive specimen. 3½x2½x1½", £16.00

10. AZURITE. Copper Queen Mine, Bisbee, Arizona, U.S.A. Select bright blue radiated ball-like crystal groups intergrown and scattered over cellular light green Malachite. Individual crystal groups range in size up to ½". 4x1½x1½", £23.00
1. BARYTES. Settlingstones Mine, Hexham, Northumberland. Choice lustrous creamy sharp wedge shaped crystals to 1/4" in size completely covering and free-standing on matrix. 4x3x1/4", £13.00

12. BERYL Var. AQUAMARINE. Taofilo Otoni, Minas Gerais, Brazil. Specimen A: Select fine pale blue sharp terminatated elongated hexagonal crystals being mostly transparent. Crystals each approx 1 1/2" long by 1 cm across the axis, £4.50p each. Specimen B: As specimen A; crystals each approx 1 1/2" long by 1 cm across the axis, £2.75p each.

13. BIXBYITE. Thomas Mts., Utah, U.S.A. Choice sharp blackish cubic crystal 5x5 mm in size implanted on matrixx25x13 mm. £6.50p

14. CALCITE. Tsumeb, Otavi, S.W. Africa. An interesting group of translucent creamy sharp rhombic crystals to 2" on face edge, with inclusions of light green DUFTITE. 2x1 1/4", £4.50p

15. CASSITERITE. Wheal Maudlin, Lanlivery, Cornwall. Bright black sharp twinned crystals to 4 mm in size richly scattered over chloritised altered slate matrix. 2 1/2x2x1 1/2", £13.00

16. CASSITERITE. Wheal Kitty, St. Agnes, Cornwall. Deep brownish lustrous small sharp crystals richly lining cavities in cellular chlorite/cassiterite veinstuff. 2 1/2x2x1 1/2", £5.00p

17. CASSITERITE. Zinnwald, Bchemia, G.S.S.R. A fine very large lustrous deep brown sharp twinned crystal. 1 1/4x1 1/4", £27.50p

18. CERUSSITE. Rum Jungle, N. Terr., Australia. Small bright sharp twinned glassy crystals richly scattered over cellular limonitic matrix with much velvety deep green MALACHITE. 2 1/2x2", £4.50p

19. CHALCOCITE. Levant Mine, Bendeen, Cornwall. Very rich metallic grey heavy mass with a little silvery Arsenopyrite in association. 2 1/2x2 1/4", £3.25p

20. CHALCOCITE. Levant Mine, Pendeen, Cornwall. Very fine bright silvery-grey sharp crystals to 5 mm in size richly intergrown and scattered on cellular hematite/quartz veinstuff. 2x1 1/2", £23.00

21. CHALCOPYRITE. Baxter Springs, Cherokee Co., Kansas, U.S.A. Fine bright golden sharp crystals to 5 mm in size richly scattered in orientated growth on intergrown large lustrous brownish SPHALERITE crystals. Specimen A: 3 1/2x2 1/4", £8.00. Specimen B: 2 1/2x2 1/2", £4.50p

22. CHALCOPYRITE var. BLISTER COPPER. East Pool Mine, Illogan, Cornwall. Bright dark golden botryoidal mass covering hematite/chalcopyrite veinstuff. 2x1 1/4x1", £3.50p

23. CHILDRENITE. George & Charlotte Mine, nr. Tavistock, Devon. Very choice bright golden transparent crystals to 2 mm in size richly scattered over light brown Siderite crystals on quartz/pyrites matrix. 1 1/2x1 1/4", £8.00

24. COLEMANITE. Boron, California, U.S.A. Fine bright creamy transparent sharp spear-like crystals to 1/2" in size richly encrusting matrix with creamy Calcite covering one side. 2 1/2x2", £9.00

25. NATIVE COPPER. South Caradon Mine, St. Cleer, Cornwall. Rich cellular metallic bright crystalline mass with much deep reddish crystallised CUPRITE and a little quartz in association. 3x2 1/2", £8.00

26. COVellite. Stuart Mine, Butte, Montana, U.S.A. Rich golden to bluish attractively tarnished platy crystalline mass. 2 1/4x2x1 1/2", £3.50p

27. CROCOITE. Kepi Mine, Dundas, Tasmania, Australia. Select bright orangey sharp terminated crystals to 4 mm in length scattered in cavities in limonitic matrix with small bright green PYROMORPHITE crystals. 3x1 1/4x1 1/2", £5.50p

28. CUPRITE. Marke Valley Mine, Linkinhorne, Cornwall. Very rich cellular mass of small sharp sparkling octahedral crystals. 3 1/2x2 3/4x1 1/2", £16.50p

29. CUPRITE. Tsumeb, Otavi, S.W. Africa. Fine bright red sharp complex crystals to 3 mm in size richly scattered over matrix with a little crystallised creamy Calcite. 3x2 1/2x1 1/2", £8.00
31. CUPROADAMITE. Tsumeb, Otavi, S.W. Africa. Choice light green sharp crystals to 4 mm in size thickly lining large cavities in sulphide-rich matrix. 3x3x1½", £23.00.

32. DIAMOND. Transvaal, South Africa. Select single sharp octahedral single crystals of a creamy to colourless or slightly smoky or yellow colour. Most show interesting growth patterns on their faces, and some crystals show twinning and various crystal modifications. Crystals are priced for perfection and size. Specimen A, 2.23 carats, 3x1½x1" in size, £33.00. Specimen B, 1.71 cts, 2½" in size, £22.00. Specimen C, 1.46 cts, 3" in size, £17.00. Specimen D, 0.97 cts, 5 mm in size, £13.00. Specimen E, 0.54 cts, 5 cm in size, £8.00. Specimen F, 0.30 cts, 4 mm in size, £7.00.

33. DAWSONITE. Francon Qry., Montreal, Quebec, Canada. Small glassy needly crystals scattered on and associated with light purple fluorite on matrix. 2x2x1", £5.50p.

34. DIGENITE. Butte, Montana, U.S.A. Very rich bright bluish tarnished metallic mass with a little golden pyrites. 3½x3x1", £8.00.

35. DUFTITE. Tsumeb, Otavi, S.W. Africa. Light green rich crystalline crusts and masses covering platy Wilfredite crystals with a little drusy Calcite. 1½x1½x1", £3.50p.

36. ERYTHRITE. Bou Azzer, Djebel Sarhro, Morocco. Lustrous raspberry-red well formed tabular crystals and crystal sections to 1½" in size intergrown on a ½" area on Skutterudite. 1½x1½", £14.00.

37. FLUORITE. Blackdene Mine, Weardale, Co. Durham. Choice transparent sea-green coloured cubic crystals to nearly 1½" in size forming an intergrown group with a little lustrous creamy crystallised Calcite deposited on some of the crystals. 3½x2½x2¼", £16.50p.

38. FLUORITE. Hilton Mine, Scordale, Westmoreland. Specimen A: Select light yellow sharp mostly clear intergrown cubic crystals to 1 cm in size thickly covering matrix. 3½x2½x2¼", £7.00. Specimen B, Fine transparent bright yellow twinned single cubic crystal showing interesting growth patterns and some parallel growth of the crystal faces. Minor sphalerite attached. 3x2½x2", £16.50p. Specimen C, Fine sharp bright cubic crystals to over 1" in size scattered on chert matrix. 3x2"., £8.00.

40. GALENA. Baxter Springs, Cherokee Co., Kansas, U.S.A. Specimen A: Fine group of large bright silvery-grey metallic intergrown cubic crystals to 3" in size. All the faces of the crystals show excellent deep growth and etch patterns. Fine specimen for display. 5¼x5x2½", £38.00. Specimen B: Choice modified bright metallic cubic crystal showing interesting growth patterns and some parallel growth of the crystal faces. Minor sphalerite attached. 3x2½x2", £16.50p. Specimen C, Fine sharp bright cubic crystals to over ½" in size scattered on chart matrix. 3x2", £8.00.

41. GROSSULAR GARNET. Lake Jaco, Chihuahua, Mexico. Specimen A: Select lustrous sharp creamy-pink crystal 2x1½" with another 1½x1½" attached. Overall size 3x2x1¼", £7.00. Specimen B: Fine sharp pinkish single crystal, 1½x1½x1½", £4.50p.

42. GROSSULAR GARNET var. HESSONITE. Vald'Ala, Piedmont, Italy. Specimen A: Fine bright orange-red sharp crystals to 4 mm in size scattered over matrix with a little Clinohlore and Apatite. 2½x2", £11.00. Specimen B: Bright orange-red small sharp crystals encrusting matrix with a little creamy Apatite. 2x1½", £4.50p.

43. HEMATITE var. KIDNEY ORE. Florence Mine, Egremont, Cumberland. Fine bright reddish-brown botryoidal mass with a partial overlay of bright black small platy SPECULARITE crystals. Attractive, display specimen. 5x2½x1½", £8.00.

44. HUREULITE. Tip Top Mine, Black Hills, S. Dakota, U.S.A. Select light rose-coloured sharp transparent crystals to 4 mm in size scattered in cavities in crystalline greenish Triphylite matrix with well crystallised LEUCOPHOSPHITE, VIVIANITE and Rockbridgeite. 2½x2½x1½", £30.00.
46. **HOLLANDITE.** Ultvis Range, Vasterbotten, Sweden. Rich metallic greyish radiated crystal masses associated with quartz and purplish fluorite. Specimen A: 3x2½xⅷ, £6.50p. Specimen B: 2½x1¼xⅷ, £3.25p

47. **INDOARSE.** Lake Joco, Chihuahua, Mexico. Specimen A: Choice lustrous intergrown group of well formed terminated yellowish crystals, the largest being 7¼" on face edge. 2½x2x1¼, £8.00. Specimen B: A select single well terminated sharp yellowish crystal. 1½x1⅝xⅷ, £5.50p

48. **ILMENITE.** Niederofleiden, Hessen, Germany. Lustrous blackish flat platy crystals and crystal sections intergrown and scattered in matrix with Chabazite and Thomsonite. 2½xⅷ, £2.50p

49. **ISO-STANITE.** Cligga Mine, Perranzabuloe, Cornwall. Very rich tarnished metallic grey mass with a little silvery Arsenopyrite. 2x2½xⅷ, £2.75p

50. **JAMESONITE.** Bodannon Mine, nr. Port Isaac, Cornwall. Rich silvery-grey metallic fibrous crystalline masses in milky quartz with a little yellowish Binchelinite. 3x2½, £5.50p

51. **LIBETHENITE.** Miguel Varcos Mine, Alentejo, Portugal. Sharp bright olive-green octahedral crystals to 2 mm in size very richly scattered over matrix. 3x2⅝xⅷ, £11.00

52. **MAGNETITE.** Nordmark, Vemland, Sweden. Sharp blackish octahedral crystals to 5 mm in size richly covering matrix. 1½xⅷ, £4.50p

53. **MALACHITE.** Cuwala, Ndola, Zambia. Select bright green tubose and botryoidal mass thickly covering matrix. Very interesting shape and form. 3x2⅝, £9.00

54. **MALAYAITE.** Meldon, Dartmoor, Devon. Rich pale yellow waxey masses scattered in creamy white wollastonite hornfels. 2½x1⅝xⅷ, £5.50p

55. **MARGASITE.** Baxter Springs, Cherokee Co., Kansas, U.S.A. A very fine group of large sharp brassy spear-like intergrown crystals to over ½" in size. There is a little orangey-brown Sphalerite on the back of the specimen. 3x2½xⅷ, £14.00

56. **MARGASITE.** Shakespeare Cliff, Folkestone, Kent. Select light brassy sharp intergrown groups of twinned spear-like crystals. Crystals vary in size from ½ to ⅷ", and the specimens are priced from £2.50p to £4.50p each according to quality. Pieces range from ⅷ"xⅷ" to 1xⅷ".

57. **MIMETITE.** Tsumeb, Otavi, S.W. Africa. Specimen A: Fine transparent sharp elongated tapering hexagonal crystals of a bright yellowy colour to 1 cm in length, very richly scattered on a cellular matrix. 1½xⅷxⅷ, £13.00. Specimen B: Fine bright orangey-yellow tapering crystals to 8 mm in size forming an attractive intergrown group with a little creamy calcite. 1ⅷxⅷ, £6.50p

58. **MIMETITE var. CAMPYLITE.** Dry Gill Mine, Caldbeck, Cumberland. Unusual lustrous orangey to greenish-yellow heavy solid crystalline mass with the upper surface showing good barre-shaped crystals to over ½" in size. A little bladed barytes in places. 2½x1⅝xⅷ, £4.50p

59. **MIMETITE.** Drianguth Mine, Caldbeck, Cumberland. Fine light green barrel shaped crystals to 3 mm in size thickly encrusting milky quartz matrix. Specimen A: 3x2⅝xⅷ, £4.50p. Specimen B: 2x2x1¼, £3.50p. Specimen C: 2x1", £1.25p

60. **MOLYDENITE.** Kingsgate, N.S. Wales, Australia. Rich metallic grey platy crystalline masses associated with milky quartz. 2⅝x1⅝xⅷ, £2.50p

61. **OLIVENITE.** Tsumeb, Otavi, S.W. Africa. Small sharp olive-green crystals richly covering matrix. 1ⅷxⅷ, £2.25p

62. **PECTOLITE.** High Force Qgr., Teesdale, Co. Durham. Select creamy-white fibrous radiated vein section. 2xⅷ by ⅷ" thick. £2.25p

63. **PHARMACOSIDERITE.** Wheal Gorland, St. Day, Cornwall. Lustrous green sharp cubic crystals to 3 mm in size lining cavities in irony matrix. 2⅝x1¼xⅷ, £4.50p

64. **PREHNITE epimorph after LAUMONTITE.** Poona, nr. Bombay, India. Select pale greenish small well formed crystals forming casts after elongated laumontite crystals. Specimens each approx 1" in size, £1.25p each.

65. **PSEUDOMALACHITE.** Coombing Mine, Garcoal, N.S. Wales, Australia. Rich deep green slightly botryoidal thick masses covering irony matrix. 2½x2⅝xⅷ, £3.50p
56. PYRITES. Govorrano Mine, Tuscany, Italy. Choice bright golden, sharp cubic crystals to 1" in size forming a fine intergrown crystal group. Fine specimen for display. 4x4x1 1/2", £27.00.

57. PYRITES. Carn Brea Mine, Illogan, Cornwall. Small sharp brassy octahedral crystals firmly covering pale brown crystallised Siderite on quartz matrix. 3x2", £2.50p.

58. PYROMORPHITE. Roughtengill Mine, Coldbeck Fells, Cumberland. Choice bright light green lustrous tapering hexagonal crystals to 1 cm in length thickly covering and lining large cavities on both sides of milky quartz matrix. Fine old-time specimen. 3½x2½x2 1/2", £68.00.

59. PYRRHOTITE. Santa Eulalia, Chihuahua, Mexico. Intergrown group of dark bronzey coloured well formed terminated hexagonal crystals to over ½" in size, with odd ball-like masses of light brown Siderite. 1¼x1", £3.25p.

60. QUARTZ var. ROCK CRYSTAL. Corinto, Minas Gerais, Brazil. Specimen A: Fine group of large clear elongated terminated crystals to 3" in length. 5x3 by 2¾" high, £40.00. Specimen B: Fine group of elongated water-clear slender terminated crystals to 2" in length. 3½x2½ by 2¾" high, £32.00. Specimen C: Choice group of water-clear elongated terminated crystals to 1½" in length. 4x2½x1¾" high, £22.00. All the above specimens are excellent for display and are virtually free of damage. They very much resemble the old specimens that came from Dauphine in France.

61. RHODOCHROSITE. Kassandra Mine, Chalkidiki, Greece. Light pink small sharp crystals attractively clustered and scattered over large areas of quartz/sphalerite/pyrite matrix with small Quartz crystals and odd bright silvery-grey twinned BOURNITE crystals to 5 mm in size. 5½x4x2½", £17.00.

62. RHODOCHROSITE. Hotazel, Cape Province, South Africa. Very choice transparent bright raspberry-red crystals to 4 mm in size thickly covering blackish pyrolusite matrix. Very attractive specimen. 1½x1½", £13.00.

63. RHODONITE. Broken Hill, N.S. Wales, Australia. Select lustrous raspberry-red well formed tabular crystals and crystal sections to over ½" in size richly scattered on and in Galena-rich matrix. 4x3x1¼", £18.00.

64. AURICHITE. Habron, Oxford Co., Maine, U.S.A. Pinkish-red columinar crystal sections to 1" in length richly embedded in purplish Lepidolite with quartz and a little Spodumene. 4x2½x1¾", £4.50p.

66. SCORODITE. Wheal Penderves, Camborne, Cornwall. Specimen A: Small sharp sparkling crystals scattered in a 1½" cavity in arsenopyrite/tourmaline veinstuff. 3x2½x1½", £4.50p. Specimen B: Select bright pale bluish crystal sprays scattered in a ½" cavity in tourmaline matrix. 2x1¾", £2.75p.

67. SIEGENITE. St. Joseph lead district, Missouri, U.S.A. Fine sharp silvery octahedral crystals to 3 mm in size richly covering creamy calcite crystals on matrix. 1⅛x1⅝x1", £15.50p.

68. NATIVE SILVER. Silver Isle, Lake Superior, Canada. Rich silvery hackly masses in quartz matrix. 1⅛x1½x1", £9.00.

69. SMITHSONITE (Cobaltian). Tsumeb, Otavi, S.W. Africa. Choice bright pink sharp crystals to ¼" in size forming an intergrown group with a twinned creamy CERUSSITE crystal 1 cm in size in association. 1½x1¼", £6.50p.

70. SMITHSONITE. Tsumeb, Otavi, S.W. Africa. Lustrous lime-green sharp crystals to 3 mm in size richly covering large areas of cellular matrix with small creamy-white Calcite crystals. 1½x1⅝x1½", £4.50p.

71. SODDYITE. Kalungwe, Katanga, Zaire. Specimen A: Select lustrous yellowish small sharp crystals richly covering most of matrix. 1½x1", £14.00. Specimen B: Small well formed yellowish crystals scattered and aggregated on matrix. 2x1½", £4.50p. Specimen C: Small yellowish crystals scattered on one end of matrix. 1½x1", £1.50p.

72. SPHALERITE. Baxter Springs, Cherokee Co., Kansas, U.S.A. Specimen A: Very large bright black sharp crystals to 1" in size richly scattered and intergrown on both sides of matrix with creamy curved rhombic crystals of Dolomite. 3½x2x2", £14.00. Specimen B: As specimen A, 2½x1½x1½", £7.00.
83. SPHALERITE. Hydraulic Shaft, Smallcleeugh Mine, Nenthead, Cumberland. Specimen A: Choice bright black sharp crystals to 1 cm in size thickly encrusting altered limestone matrix. 5x3x2", £8.00. Specimen B: As specimen A, with crystals to ½" in size. 3x2", £3.50p

84. STIBNITE. Knipes Mine, New Cumnock, Ayrshire, Scotland. Rich bright silvery-grey bladed masses associated with a little quartz. Specimen A, showing a little yellowish Stibiconite alteration in places. 4x3x1½", £4.50p. Specimen B: 3x2x1½", £1.75p

86. NATIVE SULPHUR. Agrigento, Sicily, Italy. Select mostly transparent bright yellow mostly complete single crystal showing good sharp faces. 1⅘x1¾", £2.25p

87. TARNOWITZITE. Tsumeb, Otavi, S.W. Africa. Lustrous sharp creamy crystals to ½" in size intergrown on large areas of cellular matrix. 1⅖x1¾x1⅕", £6.50p

88. TOBERMORITE. Mine Bois Noir, St. Priest-la-Prugne, Loire, France. Select light to dark green small sharp blocky crystals to 2 mm in size scattered over brownish iron quartz crystals on granite matrix. 2⅔x2x1½", £4.50p

90. ENDLICHITE (Arsenian Vanadinite). Sierra de los Lamentos, Chihuahua, Mexico. Fine light brownish elongated skeletal hexagonal crystals to 1 cm in length very richly scattered over sparkling brown MOTTRAMITE crystals on matrix. 3x3x2", £23.00

91. VARISCITE. Hot Springs, Garland Co., Arkansas, U.S.A. Rich bright green micro crystallised crusts covering large areas of matrix. 3x2", £4.50p

92. VIVIANITE. Blackgang Chine, Isle of Wight. Dark bluish crystals and crystal sections to 4 mm in size scattered on ferruginous matrix. 2½x1¾", £2.25p

93. WELGAMITE. Francon Qry., Montreal, Quebec, Canada. Sharp translucent creamy crystals to 5 mm in size richly scattered in a deep ¾" cavity in matrix with a little Analcite. 2½x1¼x1¼", £9.00

94. WITHERITE. Rosiclare, Hardin Co., Illinois, U.S.A. Sharp creamy pseudohexagonal crystals to 1" in size intergrown and scattered on matrix with odd small light purple crystals of Fluorite. 3x2¼x1¼", £13.00

95. WOLFRAMITE. Carrock Mine, Caldbeck, Cumberland. Very rich bright black bladed masses in milky quartz with rich waxy creamy-yellow masses of SCHEELITE, some showing octahedral crystal faces. 4x3x1½", £6.50p

96. WOLFRAMITE. Wheal Unity, Guennap, Cornwall. Rich bright black bladed mass with a little quartz. 1½x1⅘x1¼", £1.50p

97. WULFENITE. Sierra de los Lamentos, Chihuahua, Mexico. Fine bright orange large tabular crystals to ½" in size richly scattered over matrix with a later deposit of light golden-brown small spiky ENDLICHITE crystals. 4⅕x3½x2", £28.00

98. XONOTLITE. Bin Qry., Huntley, Aberdeen, Scotland. Rich silky creamy-white fibrous vein ¾" thick covering granite matrix. 2⅔x1¼x1½", £6.50p

99. META-ZEUNERITE. Wheal Edward, St. Just, Cornwall. Small bright green tabular crystals lining cavities in cellular limonitic matrix. 2⅔x1⅘x1", £4.75p

Our apologies for the delay in sending out this month's list - we were away on an extended collecting trip in the north of England which proved very successful, and we will be offering fine specimens resulting from this trip on the next listing.
